European Capital Requirements Regulation

Classroom: Duration: 1 Day, Price: £745

Virtual Learning: Duration 6 Hours, Price £580

Introduction

The recent banking credit crunch has exposed a lot of weaknesses in the existing European regulatory regime, and a huge appetite for new regulations amongst politicians and banking supervisors. Basel III is the latest challenge that auditors, risk managers and bankers face. In response, the EU has adopted most of these Basel III reforms through new EU Regulations and Directives which will be issued shortly. These are known as Capital Requirements Directive V and Capital Requirements Regulation VI.

This course is designed for risk managers, internal auditors and accountants to prepare them for the new requirements of the Basel rules. In particular, the course examines how banks should identify what is required from their databases and offer practical guidance on the inputs required for measuring, Loss Given Defaults (LGD's), Probabilities of Default (PD) on a long term basis. The arbitrage opportunities that were present under Basel II, and soon to be eliminated under Basel III are also identified.

Practical emphasis

There is considerable interaction between Basel III and other forms of regulation, in particular the International Financial Reporting Standards as well as new rules on disclosures and how banks should calculate bonuses. What is clearly emerging is that regulators, risk managers, accountants and bankers need to develop a 'joined up' approach to implementing Basel as well as the various other regulatory changes. Throughout this practical case study driven course, delegates will have an opportunity to identify the market, credit, liquidity and operational risks associated with various vanilla and complicated products. They will also see the accounting and disclosure implications and the impact that they have on Operational risk.

Latest developments

Review of EU Regulations

CRR2 the changes

Regulation 575 of 2013 – update

Directive 36/2013 – role of supervisors and the EU Single Supervisory Mechanism

Impact of Brexit
